Art Unit: 1614

Restriction to one of the following inventions is required under 35 U.S.C. 121.

Group I: Claims 1-5 drawn to purging malignant cells from bone marrow cells to be employed as a bone marrow graft.

Group II: Claims 6-10 drawn to killing cancer cells or inhibiting growth of cancer cells in vitro, in vivo or ex vivo.

The Group II method is a method for treating cancer per se while the Group I method is a method for treating bone marrow by first <sup>removing the</sup> ~~for treating~~ bone marrow and then treating same.

The several inventions above are independent and distinct, each from the other, as they have acquired a separate status in the art of treating cancer as a separate subject matter for inventive effect and require independent searches. It is noted that a reference to Group I method would not be a reference to the Group I method would not be a reference to the Group II under 35 U.S.C. 103. Therefore, restriction for examination purposes is proper.

Applicant is required to make a provisional election even though this requirement is traversed.
